

Smell Zapper Smoke Instructions

After shampooing/cleaning

- Lightly spray all watersafe surfaces with a fine mist:
 - Headliner
 - Seats
 - Carpets
 - Floor Mats (both sides)
 - Visors
 - Extend and mist both sides of seat belts
 - Spray into air conditioning intake vents in recirculation mode with car safely running and fan on high (all modes: defrost, floor, shoulder height)
 - Saturate in cabin air filter or replace
 - Close doors and windows and allow car to safely run for a few minutes to circulate Smoke Remover

Smell Zapper BioEnzymatic (pet odors, body odor, food, mold & mildew odors – biological odors)

After shampooing/cleaning

- Heavily saturate areas identified that may contain the source of the odor
- Lightly spray all watersafe surfaces with a course mist:
 - Headliner
 - Seats
 - Carpets
 - Floor Mats (both sides)
 - Visors
 - Extend and mist both sides of seat belts
 - Spray into air conditioning intake vents in recirculation mode with car safely running and fan on high (all modes: defrost, floor, shoulder height)
 - Close doors and windows and allow car to safely run for a few minutes to circulate

Smell Zapper Erase, concentrate and ready-to-use. Stain & Odor Remover

- Saturate stain, let sit
- Gently work Erase into the stain
- Blot dry with a clean cloth
- Stubborn stains may require a second treatment or higher concentration mix (from concentrate)

Carefully test in an inconspicuous area prior to using. Any sticky residue can be cleaned up with warm water and a clean rag.
